## Surfactants for Emulsion Polymers

### SURFACTANTS FOR EMULSION POLYMERS FOR WATER BASED PAINTS, TEXTILE BINDERS, ADHESIVES, LAMINATION & LATEX MANUFACTURING

Neopon ANP 30	Anionic surfactant for emulsion polymerization. Widely used for Styrene-Butyl acrylate, Vinyl acetate-VEOVA, etc
Noigen AM 30	Anionic surfactant for emulsion polymerization [ammonium salt].
Noigen SN 30	Anionic surfactant for emulsion polymerization.
Noigen EP 120	Anionic surfactant widely used for emulsion polymerization. VAC homopolymer, vinyl acetate-acrylate copolymer, acrylics, styrene-acrylic, styrene-butadiene, etc
Product DPS 35	Anionic surfactant for emulsion polymerization. Stabilizing agent for emulsion & dispersion.
Neowet AD 80	Anionic super wetting & emulsifying agent, APEO free. Widely used in emulsion polymerization in textile & carpet binders.
Neopon NS 13	Anionic surfactant for emulsion polymerization, APEO free. Used alone or in combination with nonionics.
Neopon TP 6	Anionic surfactant for emulsion polymerization, APEO free.
Dainol 25 P	Anionic wetting & emulsifying surfactant for emulsion polymerization APEO Free. Widely used for acrylate emulsion for adhesives & SBR latex for paper.
Noigen RE 610 A	Anionic surfactant with good wetting & emulsifying property for emulsion polymerization of acrylates, vinyl acrylates and styrene acrylates.
Noigen EPR 10	Anionic wetting and emulsifying agent.
Noigen AIR 610	Anionic surfactant for emulsion polymerization.
Neopon COP 20 / COP 205 CH	Anionic polymerizable surfactant, APEO free used for emulsion polymers for adhesives & paper coating.
Neowet PSA 2A	Anionic polymerizable surfactant, used as a primary or secondary emulsifier in emulsion polymerization. It also acts as a modifier to the resulting polymer.
Neopon JMV 24	Anionic polymerizable surfactant, APEO free used as primary emulsifier for styrene acrylates.

Noigen PA 40	Nonionic surfactant functioning as oil soluble wetting, dispersing & grinding agent. It is a co-emulsifier and coupling agent in O/W emulsions.
Noigen PE 601	Nonionic APEO free foam control surfactant because of its inverse water solubility.
Noigen OPE 25	Nonionic emulsifier and dispersing agent for emulsion polymerization either alone or in combination with anionic surfactants.
Noigen DK 30 / DK 30 (M)	Nonionic emulsifier and dispersing agent for vinyl acetate and acrylate emulsion polymer and emulsion stabilizer for synthetic lattices.
Noigen DKX 405	Nonionic surfactant as an emulsifier & dispersing agent. Primary emulsifier for acrylics & vinyls.
Noigen 2850	Nonionic surfactant used as an emulsifier & dispersing agent in the emulsion polymerization process.
Noigen SN 100	Nonionic surfactant as emulsifier & dispersing agent for emulsion polymerization.
Noigen NEP 30	Nonionic APEO free surfactant as emulsifier & dispersing agent either alone or in combination with anionic surfactants for emulsion polymerization.
Noigen NEP 70	Nonionic APEO free surfactant with higher HLB value compared to NEP 30, used as emulsifier & dispersing agent with emulsion stabilizing property.
